RADAR SCOPE

Experience the invasion of the SONIC GAMMA RAIDERS with supernatural "Laser Sound."

As Captain of the Sonic Spaceport, you must defend your station against alien Gamma Raiders which attack with vengeance and swiftly retreat to formation. Your mission is to destroy 48 enemy Gamma spaceships before there is total disintegration of all your Spaceports. You counterattack with the Rapid-Fire Laser Blaster which zooms the lasers over the 3-dimensional field of curving vectors and intercepts the enemy. The lower on the Radar screen that you destroy a Gamma Raider the more points you earn.

But be careful... Exploding decoys can damage the Spaceport and reduce the Laser Blaster's firing speed. Radar Scope's exclusive Damage Meter will light up as damage is incurred and when fully illuminated, will weaken your offensive powers. To reverse this: Attack and destroy all remaining Gamma Raiders.

Radar Scope is an endless challenge for players of all abilities. And only Radar Scope has "Laser Sound"—a system of eerie, supernatural sound effects that beam out as the disintegrating Gamma Raiders shriek in the darkness and echo through the vast galaxy into oblivion.

The operator is given a wide range of flexibility in controlling the difficulty levels of the game. Extra Spaceports are awarded at 7,000, 10,000, 15,000 or 20,000 points, as determined by the operator. The initial number of Spaceports may also be pre-programmed at 3, 4, 5, or 6. When the required number of spaceships is destroyed, the player receives an extra point bonus.

Radar Scope demands acute concentration and coordination. But remember...as your skill improves, the Gamma Raiders, re-energized with new and devastating power, launch an intensifying deadly attack of catastrophic proportions.

SPECIAL FEATURES

- RAPID-FIRE LASER BLASTER
- SANYO FULL-COLOR MONITOR
- 3-DIMENSIONAL VECTORS
- CURVATURE OF FIELD
- DIFFICULTY PROGRAMMED BY OPERATOR
- 1 OR 2 PLAYER SELECTABILITY
- 5 HIGHEST SCORES PLUS PLAYER INITIALS STORED AND DISPLAYED
- LOW MAINTENANCE-HIGH RELIABILITY
- ADJUSTABLE COINAGE
